

LVDAM-EMS - Data Acquisition and Management - Version 2.1r2

[Download LVDAM-EMS 2.1r2 \(LVEA21r2.EXE - 3265 kB\)](#)

The Lab-Volt Data Acquisition and Management for Electromechanical Systems (LVDAM-EMS) is a complete set of instruments that includes voltmeters, ammeters, power meters, an eight-channel oscilloscope, a phasor analyzer, and a harmonic analyzer.

Three languages (English, French, Spanish) are available in LVDAM-EMS.

LVDAM-EMS version 2.1r2 runs under Windows® 98 and Windows® Me, and can be used with the 9062-0X Data Acquisition Interface. If the 9062-1X Data Acquisition Interface or a later model (e.g. 9062-2X) is used, please upgrade LVDAM-EMS to the latest version.
