

Packaging Optimization to Reduce Waste

Helping to protect the environment through waste reduction has been a commitment for Lab-Volt's team for many years. Efforts are made on a continual basis to optimize the packaging of our training systems.

To that end, we are now integrating larger, reusable blue boxes whenever possible to ship our [FACET electronics boards](#). The number of boxes is greatly reduced, and the customers can reuse the new boxes to store manuals, files, etc.

See the difference for yourself with this before/after picture!
