

# eLearning for Vocational, Technical, or Engineering Training

## Top 10 Criteria for Selecting the Right System

An increasing number of school and industry instructors with vocational, technical, or engineering training needs are considering integrating eLearning into their curriculum.

If you're one of these instructors, you probably want to find the best tool for succeeding in the most efficient and painless way possible. To guide you through the evaluation process, here is a list of 10 must-have features your next learning content management system (LCMS) should possess.

Use this comparison grid to evaluate alternatives.

Top 10 Decision Criteria		Other LCMS Name:	Other LCMS Name:
1. Complete liberty in creating and customizing content	✓		
2. Easy import of external content	✓		
3. Assessment and monitoring capabilities	✓		
4. Full control over delivery	✓		
5. Web-based availability	✓		
6. Focused learning environment	✓		
7. Affordable and cost-efficient	✓		
8. Support options	✓		
9. Scalable system	✓		
10. Created by a specialized supplier	✓
