General Description	2
---------------------	---

General Description

The Industrial Controls Simulation Software features true simulations of the components of the Industrial Controls Training System, Series 8036. The precise simulations allow students to complete all the exercises in the training system courseware on a computer without the need for any actual equipment. Note that the simulation software is specially designed to perform the exercises found in the courseware, and cannot be used to perform customized exercises. The software can be used as a stand-alone product or in conjunction with the different available eLearning course formats (eSeries, SCORM, and stand-alone).

Reflecting the commitment of Festo Didactic to high quality standards in product, design, development, production, installation, and service, our manufacturing and distribution facility has received the ISO 9001 certification.
