General Description

FactoryTalk View is a Windows-based application suite, produced by Rockwell Software, which simplifies the creation of graphic human-machine interfaces (HMI), such as operator interface solutions, to monitor and control machines and small processes. This versatile suite is compatible with a wide array of devices, including PLCs and Foxboro controllers, and constitutes a distributed control system development solution of choice.

HMI applications are developed and edited using FactoryTalk View Studio, which also has limited runtime capabilities to test your interface. A completed application can be loaded directly on a Touch Screen Graphic Terminal, Model 5922 or 46973, as it includes a built-in runtime software. Your applications can also be designed to run on a computer, but doing so requires the purchase of FactoryTalk View Machine Edition Station Runtime.

A bundle (Model 46968-1 or -B) consisting of FactoryTalk View Studio and a Foxboro OPC server is available to enable communication and data exchange between a Foxboro controller (Model 46960) and a computer.

Available versions:

- 46968-0 FactoryTalk View ME Studio (Educational)
- 46968-1 FactoryTalk View ME Studio (with Foxboro OPC server, Educational)
- 46968-2 FactoryTalk View ME Station (Educational)
- 46968-3 FactoryTalk View ME Station (with Foxboro OPC server, Educational)
- 46968-A FactoryTalk View ME Studio (Commercial)
- 46968-B FactoryTalk View ME Studio (with Foxboro OPC Server, Commercial)
- 46968-C FactoryTalk View ME Station (Commercial)
- 46968-D FactoryTalk View ME Station (with Foxboro OPC server, Commercial)
