**Release date:** 2013-07-08  
Affected software: LVDAC-EMS

**Brief description of the problem:**  
Display problems may occur with high resolution screen and font size above 96 pixels per inch (100%).

**Full description of the problem:**  
When a small high resolution screen is used with Windows font size set to a different value than 96 DPI, LVDAC-EMS may have a poor interface layout like rotary knobs and button overlapping and meters missing part.

**Figure 1:** Rotary knobs and button overlapping

![Image of meter missing part](image2.png)  
**Figure 2:** Meter missing part

**How to fix:**

Windows XP

Go to *Control Panel* and click on *Display*, then click on *Appearance* tab and select *Normal* font size.  
Apply changes.
Windows 7

Go to Control Panel and select View by: Large icons, then click on Display. Change the text size to Smaller – 100%. Apply changes.
