Packaging Optimization to Reduce Waste

Helping to protect the environment through waste reduction has been a commitment for Lab-Volt's team for many years. Efforts are made on a continual basis to optimize the packaging of our training systems.

To that end, we are now integrating larger, reusable blue boxes whenever possible to ship our FACET electronics boards. The number of boxes is greatly reduced, and the customers can reuse the new boxes to store manuals, files, etc.

See the difference for yourself with this before/after picture!
